Clean energy and raw materials infrastructure (Upstream)

Hydrogen investment incentives and support framework

Robust clean hydrogen sustainability criteria

Planning and financing of clean-energy & CO₂ infrastructure for industry Climate-friendly production processes (Midstream)

Carbon Contracts-for-Difference (CCfD)

De-risking instruments for unproven technologies

Climate neutral production standards

Reformed anti-carbon leakage system Climate-friendly end products (Downstream)

Climate surcharge on CO₂-intensive final products

Requirements and labels for embedded CO₂

Recycling quality targets & end-of-life obligations

Public procurement requirements

End-of-Life (Recycling)

Steel scrap, old plastic, demolition of buildings
